Purpose

The Accreditation program was created many years ago during a challenging time in our Fraternity. We were in need of a way to monitor the health of our Chapters and Colonies and provide the support that many of them needed. This would mean stronger Chapters and better use of the Fraternity's resources.

The following are the major purposes of the program.

Chapter Audit

The primary purpose of this program is to monitor the health of our Chapters and Colonies. By requiring our Chapters and Colonies to submit information throughout the year, we can adequately determine their health and evaluate their growth. This also allows the national organization to determine strengths and weaknesses and tailor programs to improve the overall organization.

Informing Leadership Consultants

The objective for Leadership Consultants is to work with Chapters and Colonies to help them grow and improve. Often, they are given insufficient information to make their work, especially their in-person visits, ineffective. The information collected and feedback provided by graders will better arm them for their jobs. This will enable them to target specific areas in which our Chapters and Colonies need improvement.

Awards and Recognition

This program will provide an even playing field on which to evaluate Chapters and Colonies for awards. Our current awards program is independent of Accreditation and can even have conflicting results. This new program will allow for better integration of the two programs in a way that provides clarity to the disposition of awards.

Yearly Submission Process

At the 2018 Congress in Richmond, Virginia, a Motion was passed to establish an annual submission process for Chapters that have successfully been accredited. This process was to cover a calendar year, thus covering one Alpha's term. Any Chapter which was not accredited in the Fall semester submission would have to submit a full submission in Spring semester. Colonies are still required to submit every semester.

Eight Pillars

The latest revision of the program presents Accreditation based on the following eight (8) pillars.

Recruitment

A key to the success of our organization is the recruitment of new men that fit with the Values of the Fraternity and will strengthen our Brotherhood. It is important for Chapters and Colonies to have a well planned approach to recruitment. They should well define the process by which they recruit as well as the criteria by which they select men. They also need to make clear the expectations of all members. By reviewing a Chapter or Colony's approach to recruitment we can help them continue to grow in quantity and quality.

Risk Management

The longevity of our Chapters is often dependent on strong risk management practices. Too often Chapters are closed due to violations that could have easily prevented by better policies. This is particularly true for social events, but also applies to a wide array of potential crises. It is important to take a more proactive approach with our Chapter and Colony's plans for risk management to help prevent many repercussions, from fines to suspensions to closures.

Financial Management

All Chapters are responsible for collecting and dispensing money to operate. It is important that they have proper methods for managing money and show an ability to plan for income and expenses. Our goal is to ensure our Chapters remain solvent and stay out of debt.

Total Membership Education

Strong academics and continuing education are a hallmark of this organization. It is important that our Chapters emphasize this to all of their members. We expect our Chapters and Colonies to maintain programs that encourage excellent performance in the classroom. We expect that they have comprehensive plans for educating New Members as well as to continue to educate their existing members. This is all part of our mission of Building Better Men.

Ritual

The one area that distinguishes us from all other organizations is our Ritual. We expect our Chapters to respect our rich heritage and place an emphasis on properly performing our Ritual. This includes maintaining a complete set of equipment and performing Ritual on a regular basis.

Alumni Relations

Our Alumni play an important role in the success of our Chapters and Colonies. Through advising and support, Alumni ensure our Chapters and Colonies stay on the right path. We expect that our Chapters and Colonies maintain strong connections and keep their Alumni involved as much as possible.

Chapter Operations

There are several key ingredients to a Chapter operating smoothly. A Chapter is expected to have bylaws by which they operate as well as clear goals and a strategic plan. This section ensures that our Chapters and Colonies have a clear focus and meaning behind their operations.

Organizational Networking

It is important for our Chapters to be involved in their campus and local communities. We take great pride in our service and philanthropy and in developing leaders inside and outside the classroom.

Rewards Levels

The latest revision of the program has three levels of rewards and are as follows.

Accredited

This is the minimum level to pass accreditation. These Chapters and Colonies are doing what is expected by our national organization but should continue to strive for more.

Accredited with Honors

This level is being added to encourage our Chapters and Colonies to strive for excellence. Chapters and Colonies that are Accredited with Honors are exceeding the minimum expectations and will be recognized for their strong efforts.

Accredited with Distinction

Chapter and Colonies that go above and beyond and truly achieve excellence will be awarded Accredited with Distinction. These Chapters and Colonies will stand out as models for our organization and will be rewarded for their outstanding effort.

Score Calculation

The next several sheets cover each individual document. These sheets explain the grading of each document and every item that is expected. Every item has a number of points assigned. The document total is seen in columns 3 and 4 above. When graded, we will take the total number of points awarded by the grader and place that in column 5 above. We will then convert that score to a percentage and place the percentage in column 6. Columns 7 and 8 indicate the weight of that document as compared to all of the other documents. They also indicate the total number of points possible. To calculate the overall score for that document, we will multiply the weight in column 7 or 8 by the percentage in column 6. This total will be placed in column 9. The sum of all scores in column 9 will be the Chapters total.

Accreditation Levels

Accredited - 120 Points
